atulkoushal5486@gmail.com | 9203665231 | linkedin.com/in/atul-koushal-790bb937a | github.com/Atul5486

OBJECTIVE

Dedicated fresher seeking a Software Developer role to apply my technical knowledge, learn new technologies, and grow with the organization. I am eager to take on to learn new technologies, improve my skills, and contribute effectively to the team.

TRAINING

InfoBeans Foundation — Trainee

July 2025 – June 2026

Worked as a Trainee at InfoBeans Foundation , gaining hands-on experience in developing full-stack web applications using Java, Spring, SpringBoot, Hibernate, Servlets, and JSP. Built RESTful APIs , implemented business logic, and worked with MySQL databases. Involved in frontend development using React.js, React Redux, and Tailwind CSS , and used Git/GitHub for version control.

EDUCATION

Patel Group of Institutions — MCA (Master of Computer Applications)

2026 – Present

Govt. Holkar Science College — BCA, 7.71 CGPA

2022 – 2025

Govt. School Of Excellence Bal Vinay Mandi — Higher Secondary, 82.00%

2021 – 2022

SKILLS

Languages & Technologies: HTML, CSS, JavaScript, Python, Java, Hibernate, Spring, Spring Boot, Spring AI, Node.js, Express.js, React.js, Redux Toolkit, Tailwind CSS, GSAP, MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Swagger, Docker, Apache Kafka, Redis

PROJECTS

PayFlow Payment Gateway

Java Full Stack Project

- **Architecture:** Architected a distributed Spring Boot microservices system with Spring Cloud Gateway, routing 6 core services (User, Wallet, Transaction, Product, Reward, Notification) for scalable request handling.
- **Security & Auth:** Implemented JWT-based authentication and role-based access control (RBAC) with gateway-level token validation to secure REST API endpoints across services.
- **Messaging & Async Processing:** Integrated Apache Kafka (via Docker Compose with Zookeeper) for event-driven, asynchronous transaction processing, decoupling services and improving system throughput.
- **Database Design:** Modeled relational domains using JPA/Hibernate ORM with MySQL, ensuring data integrity across wallet, transaction, and reward entities.
- **API Development:** Designed and documented RESTful APIs (including multipart file/product upload) using Postman, applied rate limiting and request filtering for API security and abuse prevention.
- **Tech Stack:** React, Spring Boot, Spring Security, Spring Data JPA, Spring Kafka, MySQL, Docker Compose, Git.

Website Builder SaaS

MERN Stack

- **Product Development:** Built a full-stack SaaS platform enabling users to design, customize, preview, and deploy responsive websites with a single click, following an MVC architecture.
- **Authentication & Security:** Implemented OAuth 2.0 authentication and protected route middleware using Firebase to secure user sessions and role-based dashboard access.
- **Frontend Engineering:** Developed a drag-and-drop visual editor with real-time live preview using React.js and Redux Toolkit for state management across complex UI interactions.
- **Payments Integration:** Integrated Stripe subscription billing and webhook event handling for automated recurring payment processing and plan management.
- **Tech Stack:** React, Redux Toolkit, Node.js, Express.js, MongoDB, Firebase, Stripe, Monaco Editor, OpenRouter API.

Social Web Chat App

MERN Stack

- **Real-Time Systems:** Built a real-time messaging platform using Node.js, Express.js, MongoDB, and GetStream.io, supporting live chat, presence, and friend-request workflows.
- **Security:** Secured user sessions with JWT authentication and exposed REST APIs for user management, chat history, and social connections.
- **Video Communication:** Added WebHook-based video calling and live status updates via GetStream.io for real-time peer-to-peer communication.
- **Frontend & UX:** Created a responsive, theme-supported UI with React.js, Tailwind CSS, and Daisy UI, using an Axios abstraction layer for API communication.
- **Tech Stack:** React.js, Tailwind CSS, Node.js, Express.js, MongoDB, GetStream.io, JWT, Daisy UI, Axios.

CERTIFICATE

- **Full Stack Web Development** — National Skill Up Program by GFG(Geeks for Geeks) covering HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, REST API creation, and database integration. Build project using this technologies.
